

Myeclipse 10 激活详解过程

1、安装好 Myeclipse 10（10.1、10.5 或 10.6 等版本，理论上都可以破解，这里以 10.6 版本为例），安装完成后请暂时不要运行 Myeclipse。

2、在下载好的激活补丁目录中，双击 cracker.jar 运行激活工具（如果双击不能运行，可以双击同目录下的批处理文件 run.bat 来运行 cracker.jar），在 Usercode 栏输入你的注册用户名，选择你的 Myeclipse 10 相应版本，然后点击 SystemID...生成 SystemID:

3、生成 SystemID 后，点击 Active:

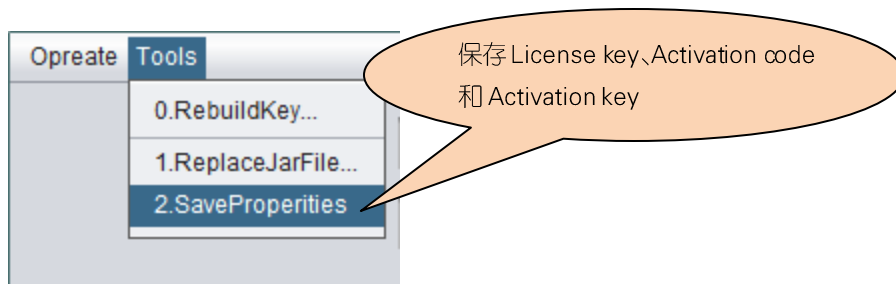

会自动生成 License key、Activation code 和 Activation key:

自动生成 License key、Activation code 和 Activation key

4、点击菜单 Tools -> 2.SaveProperties，将上一步生成的 License key、Activation code 和 Activation key 保存到 C:\Documents and Settings\Administrator\myeclipse.properties 文件中:

5、点击菜单 Tools -> 1.ReplaceJarFile..., 然后选择到 Myeclipse 安装目录下的\Common\plugins 目录, 点击“打开”:

等待一会儿, 直到出现类似以下的信息, 提示替换文件成功:
